

## *Product One Voice Q&A*

**Product:** AMSOIL Cetane Boost (ACB)

**Product Area:** Specialty Products

**Created:** 11/27/06

**Published Date:** 11/27/06

---

**1. Question:**

I received a case of ACB (Cetane Boost) and some of the bottles have different colored fluid in them. Are they the same product?

**Answer:**

Yes. The formulation of the Cetane Boost varies in color from batch to batch. Colors can range from water white to yellow. It is the nature of the product and a cosmetic feature only.

**2. Question:**

Will one color work better than the other?

**Answer:**

No. AMSOIL has done quality control testing, as with all of our products, and the varying of color has absolutely no impact on performance.
