

SUPERIOR PROTECTION FOR WINTER POWERSPORTS EQUIPMENT

Formula 4-Stroke® Power Sports Synthetic Motor Oil

Provides serious protection and performance in four-stroke snowmobile and ATV engines. Broad 0W-40 viscosity rating provides superior protection in both hot and cold temperature extremes. Provides superior shear stability and resistance to vaporization so engine wear, oil consumption, friction, heat and emissions are kept to an absolute minimum.

INTERCEPTOR™ Synthetic 2-Cycle Oil

Engineered specially for powersports applications and those engines equipped with exhaust power valves. Contains the finest synthetic base oils and additives available for exceptional cleanliness properties. Controls exhaust valve sticking and provides outstanding overall lubrication properties.

DOMINATOR® Synthetic 2-Cycle Racing Oil

Robust formulation specially engineered for unsurpassed protection in high-performance two-cycle motors, both on and off the track. Heavier synthetic base oils provide more lubricity for "on the edge" operation. Reduces friction and protects pistons and bearings subjected to the rigors of racing.

Shock Therapy Suspension Fluid

Provides maximum stability and performance in high-performance fork and shock applications. Effectively controls friction and heat and significantly reduces wear and scuffing. Viscosity remains constant and foam and aeration are kept to a minimum, limiting shock fade and inconsistent dampening. Offers superior performance in temperature extremes. Available in "light" and "medium" formulations.

Synthetic Extreme-Pressure Chaincase Oil

Superior protection and performance for enclosed chains. Extreme pressure additives provide extra wear protection. Extends chain life, repels water and inhibits rust, oxidation and foam. Superior low-temperature starting, performance and protection. Reduces high viscosity drag and increases power.

Synthetic Water Resistant Grease

Extreme-pressure multi-purpose grease offers excellent cohesiveness and adhesiveness for wet-duty performance. Provides superior protection and performance over a broad temperature range, resists water washout and degradation and seals metal surfaces against rust and corrosion.

Heavy Duty Metal Protector

Heavy-duty spray lubricant fortified with special rust and corrosion inhibitors. Penetrates and adheres to metal surfaces, leaving a dry, long-lasting wax-like protective coating. Apply to trailer frames and hitches, suspension components and any other metal surface that requires a heavy-duty lubricant or is exposed to the damaging effects of salt, moisture or chemical corrosion. Coats front suspensions and protects against road salt, and is ideal for protecting snowmobile skis while in summer storage.
